

# How to Set Up Two-Factor Authentication (2FA)

To help protect your account, we've enabled Two-Factor Authentication (2FA) using Wordfence Security. Follow these steps to set it up:

## Step 1: Install an Authenticator App

You'll need a mobile app that supports Time-Based One-Time Passwords (TOTP), such as:

- Google Authenticator (iOS/Android)
- Authy (iOS/Android/Desktop)
- Microsoft Authenticator
- LastPass Authenticator

## Step 2: Log into Your Account

1. Go to our website login page.
2. Log in with your username and password.

## Step 3: Access the 2FA Setup Page

1. Once logged in, go to your User Profile:
  - On the left-hand menu, click Users > Profile (or Your Profile).
2. Scroll down to the Wordfence Login Security section.

## Step 4: Enable 2FA

1. In the Two-Factor Authentication section, you'll see a QR code and a manual key.
2. Open your authenticator app and scan the QR code (or enter the key manually).
3. The app will start generating 6-digit codes.

## Step 5: Verify and Activate

1. Enter the 6-digit code from your app into the field labeled 'Enter Code from Authenticator App.'
2. Click Activate or Enable 2FA.

# How to Set Up Two-Factor Authentication (2FA)

## Step 6: Save Your Backup Codes

1. After activation, you'll see a set of backup codes.
2. Save them in a safe place! These can be used if you lose access to your phone.
